

IEC Research: Understanding Financial Literacy in Schools

November 2014

Jeanette Kwok

Senior Manager, Corporate Communications, Research & Planning
Investor Education Centre

Research objectives

- To review **financial literacy education** in schools;
- To identify what **teachers** need to enhance effectiveness;
- To identify **opportunities** to support and promote financial education in schools;
- To understand the **expectations** on financial literacy learning and teaching.

Research design

Desk research

- Financial literacy elements through **curriculum-mapping and non-curriculum** financial education initiatives in Hong Kong

Focus groups

- Students, parents and teachers from primary and secondary schools
- **14 focus groups** from November 2013 to January 2014

In-depth interviews

- Government departments, public bodies, school principals, academic associations, community groups, etc.
- **9 interviews** from November 2013 to February 2014

KEY FINDINGS: STUDENTS

Students' view on financial literacy

Associated financial matters with their daily life experiences
Easily influenced by their peers

Got information through the media
No structured classes or activities to help them make sense of the messages

Strong need but feel difficult to manage their money

Financial Literacy

Primary school students

Students' sharing

"I know that I have "lai see" every year. My parents always save it for me. But I don't really know how much is there..."

"My mother gives me pocket money to spend. I actually tried to save yet failed... Perhaps it is because I know she would always give me..."

Drawings on financial matters

Online game weapons,
bank, saving

Manual from school
on budgeting

Junior secondary school students

Students' sharing

"I heard from the TV programmes about many (financial) terms... My parents always talk about it... Well, I just know some but don't know what these mean to me in detail..."

"I think money is very important, and I usually do not know clearly how much I have in my pocket, not to mention the Octopus card..."

Drawings on financial matters

Spending, saving, money

Relevant school subjects

Senior secondary school students

Students' sharing

"I think I over-consume, and I do not know what exactly I can do... I don't want it to affect my future "

"We are easily influenced by friends in buying new things... The credit card misuse true story has alerted me."

"I think I am around 7 out of 10 scores for my financial capability. I would care about my future, eg whether I can earn enough for my living." (from higher income group)

"I wish I can have better control over my money management. I always want to save, but don't know why I spend the money so easily." (from lower income group)

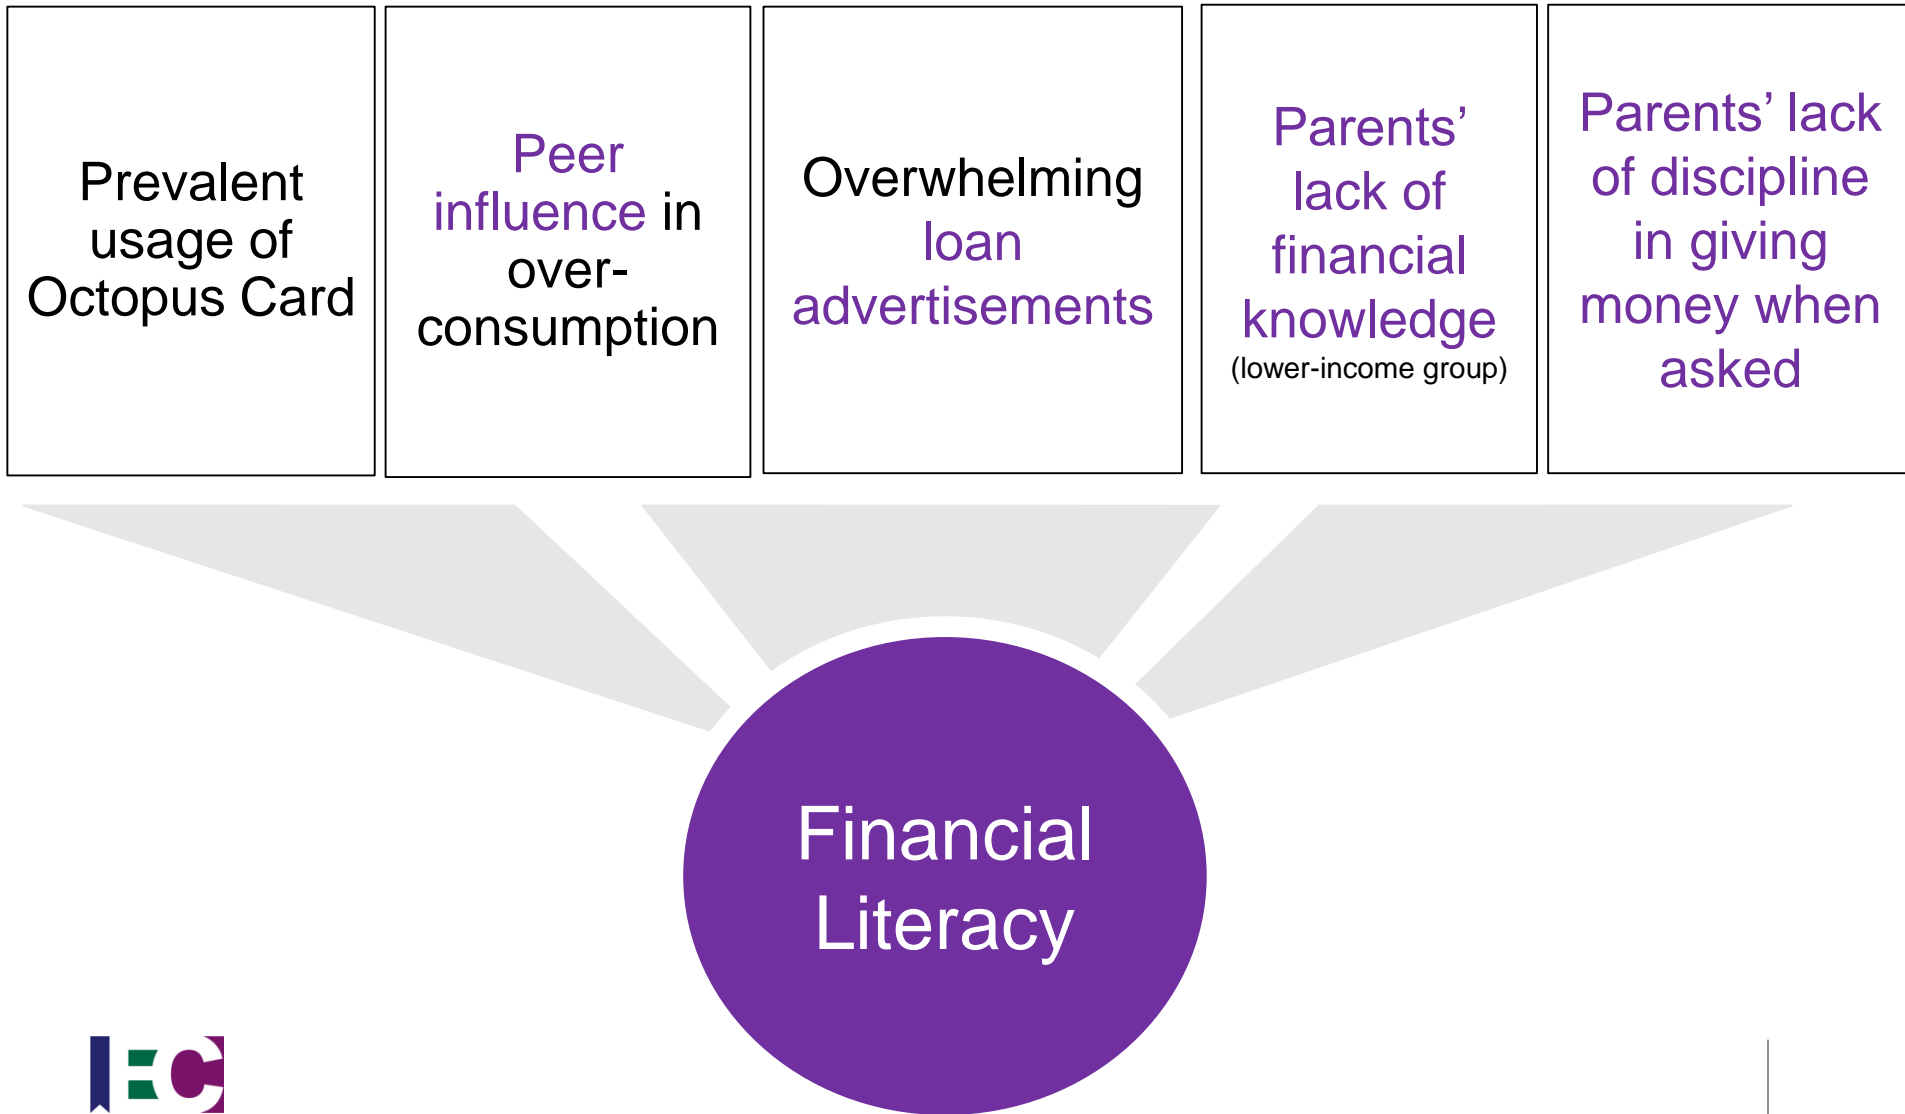

Students' preferences on learning

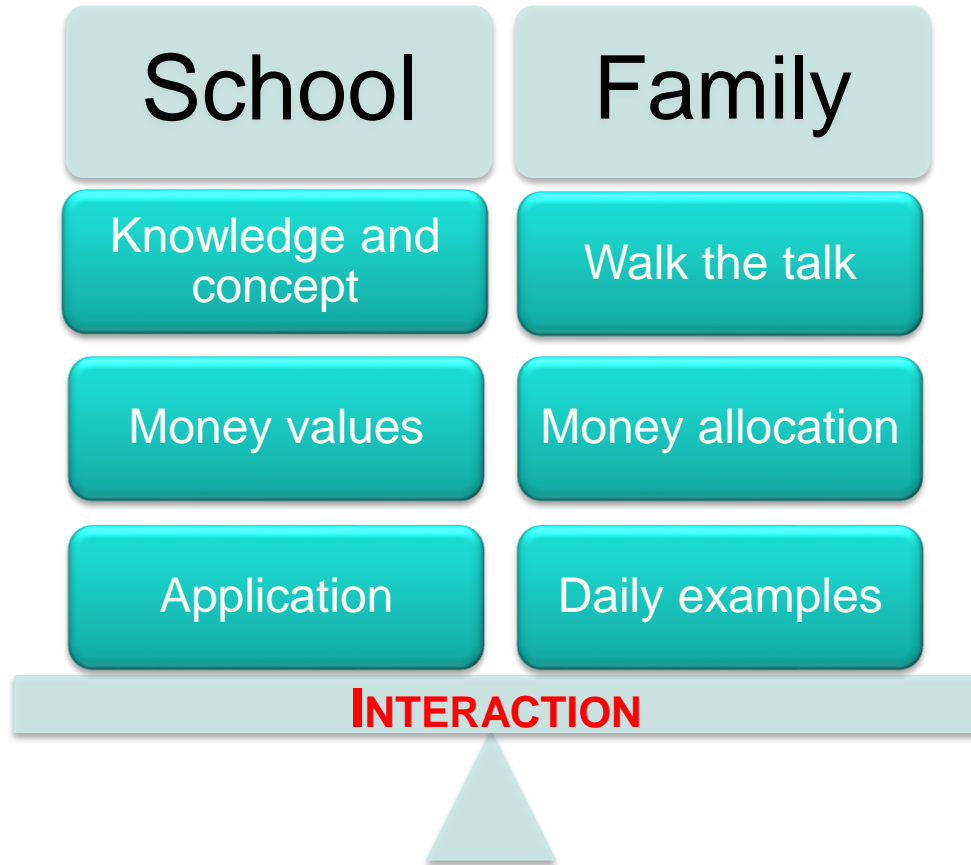

- **Activity / game-based, interactive learning and real-life experiences**
- **Diverse use of media and promo** eg social media
- **Career-related** activities and peer sharing, co-creation projects (*for senior secondary school students*)

KEY FINDINGS: PARENTS

Parents' difficulties in teaching financial literacy

Parents' view on financial education role

Parents' suggestions for financial education

Experiential learning, activity / game-based

Financial education through mass media

Provided or supported by professionals

Timing: after examination or during long holiday

KEY FINDINGS: TEACHERS

Teachers' view on students' financial literacy levels

Weak money
concepts in
knowledge and
daily applications

Overly dependent
on family in
managing their
own money

Over-consumption
and lack good
saving habits

Students'
financial
literacy

Teachers' suggested channels for financial education in schools

Career planning / life planning (for S4-S6)

Other Learning Experience (OLE) / after-school activities

Class master teaching time

Link financial education with technology

Teacher training days

Send leaflets to parents to assist the education

Teachers' preferences on financial education activities

High priority

Workshops/ game-based activities

Competitions

Curriculum-based resources

Company or organisation visits

Mid priority

Videos

Training days for teachers

Parent activities

Low priority

Talks

THANK YOU!
