

Brand Guidelines

Lockup Logo Usage

Clear Space

The clear space area around the Lockup logo is defined by half of the full height (Y) of the “IFEC” logo.

The clear space helps to make the logo more prominent and enhances its visibility.

Lockup Logo Usage

Logo Colourway

There are two colour options for the logo as demonstrated on the right.

The logo should always appear in its primary colourway.

Monochrome colourway should only be used when colour printing is unavailable, e.g. in faxes.

Primary Colourway:

Monochrome Colourway:

Lockup Logo Usage

Co-Branding Principles

The placement of logo is very important. The dominant brand should always be on the bottom left or top left while the partner logo(s) should always be on the right.

The minimum clear space between the logos is defined by half of the full height (Y) of the "IFEC" logo.

Demonstration:

Colour Palette of Lockup Logo

Colour is a key component of the brand and the use should always be bold and simple.
